Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 October 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Claims 10 and 17-21 are presented for examination.

Applicant's amendment, response and information disclosure statement filed October 31, 2007 have been received and entered.

Accordingly, the rejection made under 35 USC 112, first paragraph (written description) as set forth in the previous Office action dated June 15, 2007 at pages 2-6 is hereby withdrawn because the applicant amended the claims to recite the preferred insulin resistance-improving drugs (pioglitazone, rosiglitazone and CS-011, and salts thereof).

Accordingly, the rejection made under 35 USC 112, first paragraph for scope of enablement as set forth in the previous Office action dated June 15, 2007 at pages 6-9 is hereby withdrawn because claim 16 is cancelled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 10 and 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meguro et al. (4,687,777), Hindley (5,002,953), France Patent (2,832,064), Momose et al. (6,251,926) and Yamasaki et al. (6,166,219) in view of Khaled (5,977,073) or Giordano et al. (6,660,293), all of record, for reasons of record as set forth in the previous Office action dated June 15, 2007 at pages 9-11 as applied to claims 9-15.

Applicant's remarks regarding the prior art, Khaled (5,977,073) or Giordano et al. (6,660,293) do not vitamin B₁ or derivative thereof are used as anti-diabetic agents are not persuasive since the prior art (both references) teach the use of vitamin B₁ or derivative thereof are used with the anti-diabetic agent to reduce insulin requirement (well-known in the art, see Tamai, Japanese Journal of Clinical Medicine, Vol. 57, No. 10, pages 200-203, 1999).

The instant rejection is based upon the well established principle of patent law that no invention resides in combining 2 or more agents of known character where the results obtained are no more than the additive effects of the individual agents. It has not been demonstrated on the record by means of experimental data commensurate in scope with the claimed subject matter that applicant's combination produces any unobvious or unexpected results. The mere arguments of applicant are insufficient to overcome the strong prima facie case of obviousness without the experimental data.

Claims 10 and 17-21 are not allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
